## ALSIPERCHA CONICAL TUBES – CE VALIDITY

Encofrados J. Alsina S.A., as manufacturer of the Fall Prevention System ALSIPERCHA, reminds to end users and contractors that **the CE Certification of the system is only valid if it is being used together with the Conical Tube** (or Housing Tube) provided by Encofrados J. Alsina S.A. or any of its official distributors worldwide.

**The Alsipercha Conical Tube is the only element that ensures that the strength of the column may not be reduced by leaving this element lost into the column.**

Any alternative element used in substitution of the Alsipercha Conical Tube may produce a reduction on the strength of the column, with possible structure collapse consequences.

Moreover, the Conical Tubes is also being manufactured with a serial N° following the CE certification directives.

Encofrados J. Alsina S.A. has also available the full reports of the influence of leaving the Conical Tube lost into a column, done by the prestigious Department of Engineering in Construction of the Polytechnic University of Valencia, and with the Association of Consultants of Construction Structurist.
